

Name: \_\_\_\_\_

## Round to the Nearest 10 on a Number Line

**Directions:** Round each number to the nearest ten using the number line to help you. Type your answer in the box. Remember that if a number is exactly half-way on the number line, it will round up to the next ten.

*Example: 457 rounds to 460 because 7 is closer to 10 on the number line (so it rounds up).*

1. 84

7. 78

2. 239

8. 163

3. 116

9. 311

4. 853

10. 45

5. 123

11. 333

6. 585

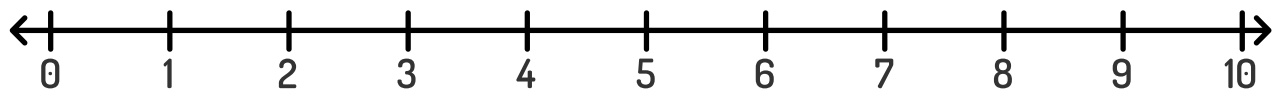

12. 913
